

Subject Description Form

Subject Code	EIE3343
Subject Title	Computer Systems Principles
Credit Value	3
Level	3
Pre-requisite	For 42477: EIE2105 Digital and Computer Systems For 42480: Nil
Co-requisite/ Exclusion	Nil
Objectives	This subject provides students with a broad treatment of the fundamentals of computer operating systems and the related system programming techniques.
Intended Subject Learning Outcomes	<p>Upon completion of the subject, students will be able to:</p> <p><u>Category A: Professional/academic knowledge and skills</u></p> <ol style="list-style-type: none"> 1. Understand the basic structure of a computer operating system. 2. Comprehend the basic concepts of file system and management, process control, scheduling and communication, as well as memory management. 3. Develop software programs to implement the abovementioned system functions. <p><u>Category B: Attributes for all-roundedness</u></p> <ol style="list-style-type: none"> 4. Understand the creative process when designing solutions to a problem.
Subject Synopsis/ Indicative Syllabus	<p>Syllabus:</p> <ul style="list-style-type: none"> • <u>Operating System Overview</u> OS objectives and functions Modern operating systems Microsoft windows overview UNIX and LINUX • <u>File System and Management</u> File organization and access File directories File sharing Secondary storage management System programming for file, directory and I/O access • <u>Process Description and Control</u> Definition of process Process description Process control Process communication System programming for process control and communication • <u>Threads and Scheduling</u> Processes and threads Thread management and scheduling Thread synchronization System programming for thread management • <u>Memory Management</u> Memory management requirement

	<p>Memory partitioning Paging Segmentation Dynamic Link Library (DLL) System programming for memory management</p> <ul style="list-style-type: none"> • <u>Processor Scheduling</u> Types of processor scheduling Scheduling algorithms Multiprocessor scheduling Case study 																	
<p>Teaching/ Learning Methodology</p>	<table border="1"> <thead> <tr> <th data-bbox="491 504 738 645">Teaching and Learning Method</th> <th data-bbox="738 504 906 645">Intended Subject Learning Outcome</th> <th data-bbox="906 504 1401 645">Remarks</th> </tr> </thead> <tbody> <tr> <td data-bbox="491 645 738 757">Lectures</td> <td data-bbox="738 645 906 757">1, 2, 3</td> <td data-bbox="906 645 1401 757">Fundamental principles and key concepts of the subject are delivered to students.</td> </tr> <tr> <td data-bbox="491 757 738 1014">Tutorials</td> <td data-bbox="738 757 906 1014">1, 2, 3</td> <td data-bbox="906 757 1401 1014">Supplementary to lectures and are conducted with smaller class size; students will be able to clarify concepts and to have a deeper understanding of the lecture material; problems and application examples are given and discussed.</td> </tr> <tr> <td data-bbox="491 1014 738 1149">Laboratory sessions</td> <td data-bbox="738 1014 906 1149">1, 2, 3, 4</td> <td data-bbox="906 1014 1401 1149">Students will make use of software tools to develop system programs in order to resolve different system problems.</td> </tr> <tr> <td data-bbox="491 1149 738 1317">Assignments</td> <td data-bbox="738 1149 906 1317">1, 2, 3</td> <td data-bbox="906 1149 1401 1317">Through working assignment and end-of-chapter problems in text books, students will develop a firm understanding and comprehension of the knowledge taught.</td> </tr> </tbody> </table>			Teaching and Learning Method	Intended Subject Learning Outcome	Remarks	Lectures	1, 2, 3	Fundamental principles and key concepts of the subject are delivered to students.	Tutorials	1, 2, 3	Supplementary to lectures and are conducted with smaller class size; students will be able to clarify concepts and to have a deeper understanding of the lecture material; problems and application examples are given and discussed.	Laboratory sessions	1, 2, 3, 4	Students will make use of software tools to develop system programs in order to resolve different system problems.	Assignments	1, 2, 3	Through working assignment and end-of-chapter problems in text books, students will develop a firm understanding and comprehension of the knowledge taught.
Teaching and Learning Method	Intended Subject Learning Outcome	Remarks																
Lectures	1, 2, 3	Fundamental principles and key concepts of the subject are delivered to students.																
Tutorials	1, 2, 3	Supplementary to lectures and are conducted with smaller class size; students will be able to clarify concepts and to have a deeper understanding of the lecture material; problems and application examples are given and discussed.																
Laboratory sessions	1, 2, 3, 4	Students will make use of software tools to develop system programs in order to resolve different system problems.																
Assignments	1, 2, 3	Through working assignment and end-of-chapter problems in text books, students will develop a firm understanding and comprehension of the knowledge taught.																

Assessment Methods in Alignment with Intended Subject Learning Outcomes	Specific Assessment Methods/ Task	% Weighting	Intended Subject Learning Outcomes to be Assessed (Please tick as appropriate)			
			1	2	3	4
	1. Continuous Assessment	50%				
	• Laboratory sessions		✓	✓	✓	✓
	• Assignments		✓	✓	✓	
	• Tests		✓	✓	✓	
	2. Examination	50%	✓	✓	✓	
	Total	100%				
Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes:						
	Specific Assessment Methods/Tasks	Remark				
	Assignments, tests and examination	End-of-chapter type problems used to evaluate students' ability in applying concepts and skills learnt in the classroom;				
	Laboratory sessions	Each student is required to answer several questions related to each lab session in the lab sheet and hand in his/her answers. Students need to think critically and creatively in order to come with an alternate solution for an existing problem.				
Student Study Effort Required	Class contact (time-tabled):					
	• Lecture	24 Hours				
	• Tutorial/Laboratory/Practice Classes	15 Hours				
	Other student study effort:					
	• Lecture: preview/review of notes; homework/assignment; preparation for test/quizzes/examination	36 Hours				
	• Tutorial/Laboratory/Practice Classes: preview of materials, revision and/or report writing	30 Hours				
	Total student study effort:	105 Hours
